

ORLANDO EVENTS CENTER

HOK Sport, Walter P. Moore, SSR ranked as most qualified Design Professional Team

After a thorough selection process, the Design Professional Selection Committee has ranked the team of HOK Sport (lead architect), Walter P. Moore (structural engineer), and SSR (mechanical, electrical, and plumbing engineer) as most qualified and pending successful negotiations, Event Center LLC will enter into a contract with HOK Sport for design services related to the new Orlando Events Center.

The Selection Committee's ranking comes as the result of a diligent selection process involving the Magic and City of Orlando officials. Following the guidelines originally outlined in the Design Professional RFP, the Magic Parties, in partnership with the City of Orlando, have developed a competitive procurement process for selection of the lead Design Professional Team. In addition, the Magic and City have also established a second and separate qualification process by which local and MBE/WBE firms will be afforded greater opportunities to be selected for a role on the project. Contingent upon entering into a contract with HOK Sport, the next step in this process will be the Community Inclusion Forum which we anticipate taking place in early August. Once available, information related to the Community Inclusion Forum may be found at www.OrlandoEventsCenter.com.

Any questions as it relates to the Design Professional selection process should be addressed to the point of contact below:
