To make our puzzles more challenging for students words used as clues in our wordsearch puzzles may or may not be words found in the text.

- What are some of the physical benefits of playing basketball?
There are cardiovascular benefits from playing this sport because the game requires much running and jumping.
- True or False: More people watch basketball than any other sport in the United States.
True.
- What is the object in any game of basketball?
Players try to score points for their team while preventing opponents from making baskets.
- What comprises a team in basketball? How many players and what positions?
There are five players - a center, two forwards and two guards.
- How does any game of basketball begin?
The game begins with a jump ball.
- What is a field goal?
A field goal is when the ball is put into the basket during the course of the active game. It can be worth either two or three points.
- Name at least three types of shots.
One-handed shot, hook shot, two-handed shot, jump shot, lay-up, tip-in, free-throw, and dunk.
- Name at least three types of passes.
Two-handed chest pass, two-handed overhead pass, one-handed overhead pass, one-handed underhand pass and bounce pass.
- Name two defense techniques.
Two defense techniques include the zone and the player-to-player defense.
- What is the difference between a fast-break and a slow-break offensive style?
A fast-break offense includes quick passes from the rebounder to the guards who typically run from defensive positions to offensive positions as soon as their opponents shoot the ball. A slow-break offense gives the offense time to set up and run their planned plays.
